It's not so common to come across such a strength like Tina. She helped me very much to look for an internship opportunity in the best possible way. Her advices were very clear and straight to the point. I appreciated the way in which the information and the whole consultancy were clearly organized and well-structured. More specifically, I found in her a great ability to motivate me to give more value to my skills and strenghts. The overall consultancy resulted in a larger amount of confidence in myself.
